A motivated and solution-oriented IT professional with hands-on experience in technical support, system administration, and customer service. Skilled in Microsoft 365, Azure, Entra ID, Intune, network troubleshooting, software licensing, and IT service management using Freshservice. Experienced in supporting users, resolving technical challenges, managing IT infrastructure, and improving operational efficiency through automation.

With a background in software development and customer-facing technical support, I combine strong analytical skills with clear communication and a customer-first approach. Currently expanding my expertise towards CAD and PLM technologies through planned practical training and professional guidance. Passionate about continuous learning, delivering reliable technical solutions, and helping customers get the most value from their technology.
